GET ACQUAINTED

Whether or not you are a resident of the Redland District, or only a visitor here, you should get acquainted with the district, its resources of fruit and vegetable growing, its people and its wonderful climate.

This is best accomplished through the

HOMESTEAD ENTERPRISE

(ESTABLISHED 1912)

Our Platform for the Redland District

Completion of the Key Largo Road.

A definite city plan for Homestead, providing for future growth.

County main highways 80 to 100 feet in width, with side roads at least 60 feet.

Arterial streets through the city to avoid traffic congestion.

A "City Beautiful" with trees and shrubs on every street.

A 100-foot canal to Biscayne Bay.

Completion of the Seaboard Air Line from Miami to Homestead.

Erection of a moderate priced tourist hotel.

Adequate water and sewerage facilities in all parts of the city.

Establishment and encouragement of legitimate industries.

A population of 20,000 in two years.

A steady growth, minus paper inflation and false values.

A building code which protects the honest builder and property owner.

Maintenance of law and order.

Adequate parks and playgrounds.

Completion of the golf course.

Immediate extension of Krome avenue to the Tamiami Trail.

Maintenance of cordial relations between the communities of the Redland District.

WRITE FOR SAMPLE COPIES AND LITERATURE

SUPREMACY

With a PAID circulation in its territory, greater than the combined paid circulation of all the major newspapers circulated in the Redland District, the Homestead Enterprise is the acknowledged leader of the field.

POLK'S HOMESTEAD-REDLAND DISTRICT DIRECTORY

1927-1928

Including Florida City, Goulds, Modello, Naranja, Princeton, Redland
and Silver Palm

COMPRISING

MISCELLANEOUS SECTION (page 11), containing Municipal and County Government information, Churches, Fraternal, Secret and Benevolent Societies, Etc.

BUYERS' GUIDE (page 21)—Advertisements of leading houses in all lines where more information than is possible to give under the headings, is placed on file for Buyers' Reference, the value of which department cannot be overestimated. It is an index to the best interests of the city, and stands for them and the city in reference libraries all over the country as well as on the desks of progressive business men. It is accessible to everybody and the logical place to look for specific information. This probably explains why no other form of publicity is so generally endorsed by business men as a glance at this department will show.

ALPHABETICAL SECTION (page 49), gives names, occupations and addresses of all men twenty years old or over, together with wife's name where married, also widows with given name of husband. Full copartnership and corporation information is contained in this department, together with complete business and professional information. Names in large type are those who realize the value of placing themselves where they may be speedily and conveniently found.

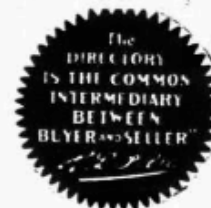

STREET and AVENUE GUIDE and DIRECTORY of HOUSEHOLDERS of HOMESTEAD (page 197), showing all streets and avenues with starting point and intersections, enabling one to tell at once between what streets a given number lies, consequently the quickest way to get there.

Also the names of heads of houses and of all business and professions.

CLASSIFIED BUSINESS DIRECTORY of the Redland District (page 161). All business houses, individuals in business for themselves, and professional men are listed without charge under the heading that best describes them. The more progressive houses, realizing that it pays to be easily found, pay a nominal charge for special listings in heavy type, under every heading where a buyer might look for them, cross indexed to a descriptive space in the "Buyers' Guide." More goods are bought and sold through classified Directories than through any other medium.

HOMESTEAD

Homestead Chamber of Commerce

In every city some organization must centralize the general activity of the city in commercial and industrial lines and in civic betterment. The Chamber of Commerce is the logical organization in Homestead. It is the instrumentality through which enterprising business men may co-operate to make a greater and better city. It concentrates the best business activities of the municipality and affords an agency through which all can work for civic uplift. There must be such an organization if true civic spirit is to be kept alive and intelligently directed. The Chamber has done well, is doing well and hopes to do even better. It has been a potent factor for the advancement of the city and its unity of purpose and plans still further insure the continued prosperity of Homestead.

Library of City Directories

The Chamber of Commerce has a library of city directories of the leading cities of the United States in their rooms. These directories are used by people desiring to locate friends and business connections in other cities, and to learn about their characteristic features—civic, commercial, financial, educational and industrial. This library is being added to each month, and patrons and the public are invited to make the fullest use of this service.

MUNICIPAL PUBLICITY

Advertising Homestead

The City Directory is the sole medium by which information regarding the municipality, its civic affairs, commercial, industrial, social and professional interests are spread broadcast over the country, as copies of this Directory are placed by the publishers in the Directory Libraries in all the larger cities of the country, where they are readily available for reference by the public. There they serve as perpetual advertisements of Homestead, for business and professional men, as well as citizens generally, throughout the country realize that the City Directory represents the community as it really is, local features and prominent attractions being clearly itemized.

The City Directory

is the most effective and most economical method of reaching all the people all the time. Those who buy without looking at the list of those who sell do themselves great injustice. The classified lists in the Business Directory form the best Buyers' Guide on earth. A modern, up-to-date method of getting what you want.

ONE OF 200 POLK DIRECTORY LIBRARIES

**This Little Library Can Answer
945,000,000 Questions****MANY TRIPS AT YOUR FINGER-TIPS —
SAVE MANY MILES, MINUTES and DOLLARS**

There are over 300 of these directory libraries in the United States. They are installed and maintained by the Association of North American Directory Publishers as part of the service given to directory advertisers.

Think what this means to you in effort, time and money saved. You want to know the relationship of the signer of a letter to the firm he represents—the directory library has the answer; someone you vitally need to get in touch with in a distant city has moved; business addresses or firm names have changed—the directory library has the answer. Public officials have been replaced by new elections; location of real estate is desired—again the directory library holds the answer.

Of course you could write or phone for the data you desire, but maybe you don't know just who to approach—the directory library has the answer.

This service is free, for single reference, to the public.

Send for list of libraries and privilege card

The Redland District of Florida

*Its sunny groves,
fertile farms
and
glorious climate*

*mean the end of the
trail to the seeker
of health
and prosperity*

Telling the simple truth about the advantages of the Redland District has been, and always will be, sufficient to attract seekers of good homes, farm and grove lands and good health.

We who live here and have benefited by the profusion of natural bounties offered by the district, know by happy experiences that opportunities unequalled elsewhere abound on every hand.

Our citizenship is of fine quality and is cosmopolitan in character, being drawn from practically every state in the Union.

Our community pride and spirit are strongly developed. We are in truth a typical American community, progress being our watchword and guiding our united endeavors.

Every opportunity will be afforded our visitors and prospective homeseekers to "investigate before investing." Inquiries are welcomed and will be courteously answered without delay.

Redland District Chamber of Commerce

OFFICE

Redland District Chamber of Commerce Building
HOMESTEAD, FLORIDA

REDLAND DISTRICT

Home of the Avocado

The Redland District is the most tropical section of the United States. It is the only section enjoying the advantages of the real tropics. Being located at the southern tip of Florida, with the ocean on the east and the Gulf of Mexico on the west, the whole district is kept cool night and day through the summer by the trade winds. The winters are very mild because of the tropical sun, and tropical fruits, flowers and vegetables really grow better in the winter than in the summer. At least three and four crops are made by vegetable growers.

Within the Redland District are a number of small towns. The City of Homestead is the largest of these and is the business center of the district. Homestead is a modern city in every way, having water, sewerage, electricity, police and fire departments. The streets are well paved, and lit with "White Ways". There are business places of all characters, and prosperous. Two railroads enter the city. The Seaboard All Florida Railway and the Florida East Coast Railroad. These railroads of course touch all the other communities, and have depots in each. Fraternal orders are represented by two Masonic lodges—Royal Arch, Eastern Star, Odd Fellows, Rebekahs, Knights of Pythias and Woodmen of the World. The business men of the community have a large and active Lions Club and a Rotary Club, both organizations taking an active part at all times in movements for public betterment. There is also a very active Women's Club, and also a free public library. The Homestead Golf and Country Club is constructing a beautiful nine-hole golf course with clubhouse in connection. Experts praise this golf course as having an unusually attractive setting. In Homestead there are canneries for fruit and vegetables; there are three large ice manufactories; many large packing houses for packing fruit and vegetables. Homestead and the Redland District water is the purest in the state, contains no organic matter and is more than 99% pure. Because of this the city ships to Key West daily to the extent of more than 500,000 gallons per diem. It is carried out in trains.

Florida City, an immediate neighbor on the south, is a beautiful town in a tropical setting with broad streets and attractive homes. She enjoys the distinction of being the last town south on the mainland of the state. From here are roads leading to Key Largo and to Royal Palm State Park and Cape Sable, spots of world-wide interest, especially to fishermen and sportsmen. Aside from her natural attractions, Florida City has good churches, fraternal organizations and community clubs.

Schools—The Redland District is well represented by a number of well planned school buildings. The Homestead high and grammar school are new and modern in every way. There is an A class senior high school on the accredited list of southern colleges and has been on the list for four years. Besides the regular academic work in the high school, manual training, home economics and agriculture are all given a prominent place in the course of study. Florida City has a well equipped school building, and the Redland Farm Life school building, located in the district, serves all those children not attending Homestead or Florida City schools.

Churches—The leading religious denominations are well represented and together have done much to cultivate and sustain a true moral atmosphere. The Baptist, Methodist, Episcopal, Catholic and Christian churches each have comfortable and attractive edifices.

Other Districts—To the north of Homestead and along the Seaboard All Florida Railway are Redland, Silver Palm and Aladdin City. To the northeast and along the Florida East Coast Railroad and the Dixie Highway are Goulds, Princeton, Naranja and Modesto.

So all these towns constitute the Redland District. The Redland District, comprising an area of fifteen square miles, and located twenty miles south of the City of Miami, is not named after Redland, California, or any other city. The first white men to settle in the district met to decide on a name. One of them called attention to the red soil—not red clay—so prevalent, and so the pioneers voted to originate the name Redland for this section of Florida. Then they set out to clear the land, planted citrus and avocado groves, and tomatoes, beans and other fruits and vegetables, and were not long in discovering that they were happy dwellers in a land of plenty.

Roads—Through the district are over three hundred miles of well surfaced, oiled roads, enabling the citizens to reach the most distant point from the center of activities in most modern ways. Also, at this moment the district is speeding up the construction of the overseas highway, which passes through the heart of the district and which, when completed, will pass over the Florida Keys and the ocean to the southern terminus at Key West, and will, for the features of passing over the ocean and the keys, and the tropical lands, become the greatest highway in the world. The extension of Krome Avenue, the main business street in the City of Homestead, will reach to the Tamiami Trail, and the work of constructing the road in the district to the

point of continuance has been finished. North of this point there is but a very few miles of completion. This road will connect us with our neighbors on the West Coast and the City of Tampa.

Fruits—Oranges, Tangerines, Grapefruit, for juiciness and fine flavor, they are unequalled in the state. The market for these fruit is right at our door—Miami, the Magic City. Then we have the King Orange, a citrus fruit that can only be grown here profitably commercially. Mangos, Guavas, Dates, Bananas, Lemons, Limes, Tangelos, Papays, Kumquats, are all raised commercially. It will only require a few well kept acres to return a good living income, under the ideal climatic conditions of the Redland District.

Vegetables—A great variety of vegetables may be grown in the district, aside from tomatoes there is nothing more profitable than beans, usually called snap beans, peppers, cabbage, lettuce, egg plant, radishes, spinach, carrots, sweet potatoes, beets, celery and onions are all grown to advantage.

Tomatoes—The greatest vegetable crop of the Redland District. In proportion to area this district has come to be the greatest producing section of winter tomatoes in the state of Florida. The bulk of the crop is grown on the eastern prairie side of the district, in the marl or "slade" soil, which is rich in alluvial matter. No expensive clearing or developing is necessary on this soil, and by the use of a proper amount of fertilizer to promote rapid growth, tomatoes may be made to produce large and profitable yields. The net returns to growers depend upon yield and market prices. Yields range from 200 to 500 crates per acre. Even larger yields have been made on fresh land. A conservative average yield is 250 crates. The price varies during different seasons from \$1.50 to \$5.00 per crate, according to quality and market conditions. With a good yield such prices afford a very satisfactory profit. Every town in the district is well supplied with packing houses which are large with modern equipment. Some of these houses are managed by co-operative associations, others are independent concerns. The fruit may be shipped by the two railroads in the district, or it may be hauled to Miami over level paved roads and transported by steamship lines.

Poultry—One poultry man, who has had forty years' experience in the north, and is now located in the Redland District, states that nowhere else has he found conditions so favorable for poultry raising, and now proves this confidence by having one of the largest poultry yards in the state. Others are now seeing the light, and developers are interesting themselves with large tracts of land for the purpose of poultry raising. Prices of eggs average from thirty-five cents to one dollar per dozen, and pullets always command fancy prices. Our market naturally is Miami, for there are car loads of eggs and chickens being shipped into the city from other states and cities. Chicks may be hatched in the early winter months and the fliers disposed of at prices ranging from 60 cents per pound upwards. There is unusual freedom from mites and lice, and the poultry man who has been accustomed to continuous battling against these common pests will find here great relief.

The Famous Avocado

Even if the Redland District did not possess so many other desirable features, it could justly claim preeminence on its avocado industry alone. This wonderful fruit, which has been pronounced by physicians, horticultural experts, and the United States Bureau of Agriculture as the most perfectly balanced food-fruit in existence, is grown to absolute perfection in the Redland District, whose soils, climate, length of growing season, economy of production, quality and varieties of fruit grown, all conspire to make the Redland District easily first in the very limited avocado-growing sections of the United States. The avocado requires a well-drained soil with a plentiful supply of moisture and a tropical climate, both of which are supplied to perfection in the Redland District. There is here no necessity for the use of grove heaters with the incident expense; the growing season is practically year around, and the final result of all these advantages is that we can develop a number of the finest varieties of the fruit to bearing and profitable age within three or four years. It is a mere statement of actual fact when we say that the Redland District has been demonstrated to be the best avocado land in the world, and when the very limited area of the district is considered it is no wonder that the acreage planted to this fruit is increasing by leaps and bounds. This limited area, combined with the fact that the demand will always exceed the supply, makes over-production a practical impossibility.

It must be remembered that the avocado has thus far been given very little, if any, advertising. Its fame has been spread largely from one individual to another, and although the demand is far greater than the supply at present, the fruit is not widely known at its true worth. Consider that the food value of the avocado is equal and even superior to eggs and milk as proved by expert analysis; that in the treatment of diabetes, neuritis and several chronic disorders it is an invaluable curative agent and is so recommended by physicians; and that in itself it is a most delicious as well as nutritive salad or breakfast fruit, and it will readily be seen why avocado growing is proving so profitable and why the acreage is increasing so rapidly.

An avocado tree, ten or fifteen years old, will bear every year from one to two thousand fruit, each weighing from 1½ to 3 pounds. The tree commences to bear in the third or fourth year and the yield increases steadily and indefinitely, as the age of an avocado tree exceeds the span of a man's life.

Extensive Government research and experimentation by local growers, have brought new and valuable varieties to the front, and we are now assured of the fact that this valuable and delicious food-fruit may be marketed every month in the year as the different varieties mature. The prices received for the fruit range from \$1.50, the lowest known, to \$7.20 per dozen on the tree. At the end of the third year the avocado will yield at the rate of \$3.00 per tree (about seventy trees to the acre) and thereafter the tree will increase its yield at the rate of \$3.00 per

tree with an indefinite maximum. One of the oldest trees in the Redland District now produces a profit of \$200.00 per year and its age and bearing limit still remain a question for the distant future to decide. Such instances of high profits from avocados could be multiplied ad infinitum. Suffice to say that such an investment is difficult to equal, and its attractiveness has brought a great deal of new capital to the industry within the past two years, which is well satisfied with the results.

TRADE! You like
to patronize those concerns
who are in business to stay.

It's human to expect that such business establishments always stand back of the wares they sell.

The advertising in this Directory is suggestive of the stability and permanency of the advertisers.

Frauds, fakes, get-rich-quick and other schemers have little use for directory advertising. It lives too long.

The modern City Directory is a business institution. It occupies a place peculiarly its own. It is as necessary to the progress and development of a city generally as anything naturally would be which deals with such a fundamental as the citizens themselves.

If you are not advertising your business in the Directory, may we explain how and why it will pay you?

THE PUBLISHERS

Association of North American Directory Publishers

General Offices: 524-528 Broadway, New York City

The Association of North American Directory Publishers is composed of reputable City Directory Publishers, organized for the general advancement of the Directory business. Any person, corporation or firm engaged in business as owner and publisher of a City Directory in the United States or Canada, who shall qualify as competent to gather information and compile a City Directory and furnish satisfactory references, is eligible to membership.

The objects of the Association are:

First. The advancement of the Directory business and the improvement of Directories by the interchange of ideas and the exchange of experienced employees.

Second. To provide protection to the public against fraudulent advertising schemes which operate under the name of Directories, and to drive unprincipled promoters of the same out of business.

Third. To provide permanent and profitable employment to competent, industrious and honest Directory canvassers and compilers.

Fourth. For the mutual protection and advancement of the established and prospective interests of all who may become members, by personal advice and assistance of members as may be mutually satisfactory, desirable or advisable, and by such other means as may, from time to time, be shown to be wise, proper and lawful.

All members of this association have subscribed to the following

STANDARDS OF PRACTICE

1. To consider, first, the interest of the user of the book.
2. To subscribe to and work for truth, honesty and accuracy in all departments.
3. To avoid confusing duplication of listings, endeavoring to classify every concern under such headings as best describe it, and to treat additional listings as advertising, to be charged for at regular rates.
4. To increase public knowledge of what directories and reference media contain; to study public needs and make directories and reference media to supply them; to revise and standardize methods and classifications so that what is wanted may be most easily found, and the directory and reference media be made to serve their fullest use as business and social reference books and directories of buyer to seller and seller to his market.
5. To decline any advertisement which has a tendency to mislead or which does not conform to business integrity.
6. To solicit subscriptions and advertising solely upon the merits of the publication.
7. To avoid misrepresentation by statement or inference regarding circulation, placing the test of reference publicity upon its accessibility to seekers as well as on the number of copies circulated.
8. To co-operate with approved organizations and individuals engaged in creative advertising work.
9. To avoid unfair competition.
10. To determine what is the highest and largest function of directories and reference media in public service and then to strive in every legitimate way to promote that function.

\$100.00 REWARD will be paid by the Association for the arrest and conviction of any person or persons engaged in publishing, collecting or canvassing for any fraudulent or "fake" Directory.

MORE GOODS are bought and sold through the **Classified
Business Lists** of the **Directory** than **any
other medium** on earth.
